

Reza Nugraha

Bogor, Indonesia | +62 857-1488-9897 | rezanugraha105@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portofolio](#)

Detail-oriented Fullstack Developer with hands-on experience architecting scalable web applications following MVC and OOP design patterns. Proficient across the full stack with Laravel, CodeIgniter, Python Flask, and Node.js, with expertise in RESTful API design, authentication & authorization (JWT, OAuth), responsive design (Tailwind CSS), and SQL/NoSQL database management. Adept at delivering secure, high-performance solutions and collaborating within cross-functional teams.

Work Experience

Maritim Muda Nusantara (Magang Kemnaker) – Jakarta, Indonesia

Nov 2025 – May 2026

Web Development and Administrator

- Handled fullstack development of the Maritim Muda Hub platform (**Laravel MVC**) end-to-end alongside 1 other developer, delivering 2 of 5 core modules plus 5–8 features and enhancements.
- Led backend development of Turbines, an internal **HRIS** for Maritim Muda Nusantara, within a **13-person cross-functional team** defined technical requirements, designed service boundaries, and delivered a production-ready system from zero.
- Ensured secure, structured employee data management with **audit-compliant access control**, enabling the company to replace a manual HR process with a centralized digital system.

• WWGI Impor – Indonesia

Feb 2026 – Apr 2026

Freelance Fullstack Developer

- Extended and enhanced an existing **CodeIgniter 4 (MVC)** import management system, delivering 4–6 client-requested features including a blog, product catalog, RMB exchange rate tracker, and announcement board.
- Revamped landing page with responsive design using **Bootstrap** and **custom CSS**; engineered secure packing list and insurance features with one-time access links (**Token-based authorization**).
- Built an importer dashboard with backend API integration in a 3-person team, handling both frontend and backend within the existing **CI4 fullstack codebase**.

Projects

Turbines – Backend Developer

Nov 2025 – May 2026

Internship Maritim Muda Nusantara – Team of 13

- Architected the full backend for an internal **HRIS** from zero using **Python Flask** and **PostgreSQL** with **microservices architecture**. Built 2 core modules (BizDev & Finance) with **OOP design patterns**, **JWT authentication**, and **role-based authorization**.
- Engineered all data models and RESTful API contracts for the HRIS microservices, ensuring clean service boundaries and audit-compliant access control for internal company use.

MakanYuk – Fullstack Developer

Jul 2025 – Aug 2025

Undergraduate Thesis Project

- Built a full-stack food review platform, solo developed **RESTful APIs** with **Hapi.js**, interactive UI with **Tailwind CSS**, and geo-based restaurant discovery with **Leaflet.js** map visualization.
- Designed a normalized **PostgreSQL** schema and applied **MVC architecture** and **OOP design patterns** throughout the fullstack codebase.

Tabir (Tangan Bicara) – Frontend Developer

Jun 2025 – Jul 2025

Coding Camp DBS Foundation Capstone Project – Team of 6

- Developed responsive, accessible UI using **HTML**, **CSS**, **JavaScript** with responsive design for real-time sign language translation; **integrated ML model**.
- Applied **OOP** and modular JavaScript patterns to ensure clean separation of concerns and maintainable frontend architecture.
- Collaborated within a team to implement machine learning models into the web platform effectively.

Education

Indraprasta PGRI University – Jakarta, Indonesia

Sep 2021 – Aug 2025

Bachelor's Degree in Informatics Engineering | **GPA: 3.73**

- Relevant Coursework:** Core Programming (Java), Web Development, Database Systems.
- Bootcamps:** Coding Camp by DBS Foundation (Frontend & Backend), Bangkit Academy led by Google (Mobile Development).

Awards

- **Distinction Graduate** — Coding Camp powered by DBS Foundation (Top cohort graduates recognized for outstanding project performance), 2025.

Certifications

- **Mobile Developer Training** – Bangkit Academy led by Google, GoTo, and Traveloka.
- **Frontend & Backend Developer** – Coding Camp powered by DBS Foundation.
- **Android & Web Learning Paths** – Dicoding Indonesia.
- **English for Business Communication** – TBI Certification.

Technical Skills

- **Languages:** JavaScript, PHP, Python, SQL, HTML/CSS, Kotlin, Java
- **Frameworks & Libraries:** Laravel, CodeIgniter 4, Flask, Node.js (Hapi.js), Tailwind CSS, Leaflet.js
- **Databases & Tools:** PostgreSQL, MySQL, Git, Webpack, Postman, Android Studio
- **Architecture & Patterns:** MVC, OOP, RESTful API Design, Microservices concepts, Responsive Design
- **Security:** Authentication, Authorization, JWT, OAuth, one-time access links
- **Languages:** Indonesian (Native), English (Professional Working Proficiency)
