Bogor, Indonesia | +62 857-1488-9897 | rezanugraha105@gmail.com | [LinkedIn](#) | [GitHub](#)

Detail-oriented Fullstack Developer with solid experience in building scalable web applications using Laravel, Codelgniter, Python Flask, and Node.js. Proven track record in managing SQL databases and developing responsive user interfaces utilizing modern utility-first frameworks like Tailwind CSS. Strong problem-solving abilities and a continuous learner with expertise in delivering secure and efficient solutions across both frontend and backend architectures.

Work Experience

Maritim Muda Nusantara (Magang Kemnaker) – Jakarta, Indonesia

Nov 2025 – May 2026

Web Development and Administrator

- Maintained and optimized the "Maritim Muda Hub" website using the **Laravel** fullstack framework, actively managing frontend updates and backend logic to improve system reliability.
- Engineered the backend architecture for a new Human Resource Information System (HRIS) using **Python Flask** and **PostgreSQL**, ensuring structured and secure employee data management.
- Collaborated with cross-functional teams to align technical specifications with business goals, performing regular maintenance and troubleshooting to guarantee platform stability.

WWGI Impor – Indonesia

Feb 2026 – Mar 2026

Freelance Fullstack Developer

- Developed an end-to-end import management system utilizing the **Codelgniter** framework and **SQL Database**.
- Revamped the landing page UI by integrating **Tailwind CSS** with custom **CSS** to achieve a highly responsive, modern, and high-performance user experience.
- Built essential customer service modules, including a blog system, product catalog, RMB exchange rate tracker, and announcement board.
- Created an informative dashboard for importers and engineered secure packing list and insurance features utilizing one-time access links.

Education

Indraprasta PGRI University – Jakarta, Indonesia

Sep 2021 – Aug 2025

Bachelor's Degree in Informatics Engineering | GPA: 3.73

- Relevant Coursework:** Core Programming (Java), Web Development, Database Systems.
- Bootcamps:** Coding Camp by DBS Foundation (Frontend & Backend), Bangkit Academy led by Google (Mobile Development).

Projects

Tabir (Tangan Bicara) – Frontend Developer

Jun 2025 – Jul 2025

Coding Camp DBS Foundation Capstone Project

- Developed responsive user interfaces utilizing **HTML**, **CSS**, and **JavaScript** to create an intuitive experience for translating sign language into real-time text.
- Integrated backend APIs seamlessly into the frontend architecture to ensure smooth data transmission and real-time functionality.
- Collaborated within a team to implement machine learning models into the web platform effectively.

MakanYuk – Fullstack Web Application

Jul 2025 – Aug 2025

Undergraduate Thesis Project

- Developed a full-stack web application for food reviews with integrated map visualization using **Leaflet.js**.
- Built RESTful APIs using **Hapi.js** and designed an interactive UI with **Tailwind CSS**.

Technical Skills

- **Languages:** JavaScript, PHP, Python, SQL, HTML/CSS, Kotlin, Java.
- **Frameworks & Libraries:** Laravel, CodeIgniter, Flask, Node.js, Tailwind CSS.
- **Databases & Tools:** PostgreSQL, MySQL, Git, Webpack, Postman, Android Studio.
- **Areas of Expertise:** Fullstack Web Development, RESTful API Design, Frontend Integration, Database Management.
- **Languages:** Indonesian (Native), English (Professional Working Proficiency).

Certifications

- **Mobile Developer Training** – Bangkit Academy led by Google, GoTo, and Traveloka.
- **Frontend & Backend Developer** – Coding Camp powered by DBS Foundation.
- **Android & Web Learning Paths** – Dicoding Indonesia.
- **English for Business Communication** – TBI Certification.
